DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I: Species of stopping points;

Species A: the stopping point of the computation of F_Q is set when $F_Q > \alpha_0$.

Species B: the stopping point of the computation of F_Q is set when $|Q| < n_0$.

Species C: the stopping point of the computation of F_Q is set when $\beta_Q > \delta_0$.

Species D: the stopping point of the computation of F_Q is set when $|Q'/Q| > \alpha_1|Q'|$.

II. Species of data

Species E: Associated with gene expression

Species F: Associated with financial trends

Applicant is required, in reply to this action, to elect a single species from EACH of Groups I and II, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is

Art Unit: 1631

allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species Category I:

Species A: claims 8, 20 and 32

Species B: claims 9, 21 and 33

Species C: claims 10, 22 and 34

Species D: claims 11, 23 and 35

Species Category II:

Species E: claims 2-3, 14-15 and 26-27

Species F: claims 40-42

The following claim(s) are generic: claims 1, 4-7, 12-13, 16-19, 24-25, 28-31 and 36-39.

Art Unit: 1631

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: With regards to category I, each stopping criterion is mathematically unique as its own special technical feature. With regards to category II, data pertaining to gene expression and financial trends are each unique, each as its own special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
